

Internship Opportunity: QA Engineer Intern

Position: QA Engineer Intern / Software Testing Intern

Department: Quality Assurance / Product Engineering

Location: Indore / Mumbai

Internship Duration: 3–6 Months

PPO Opportunity: Yes – Based on Performance

Eligibility

Students pursuing:

- B.Tech / M.Tech
- Computer Science / IT / Software Engineering
- Preferred from IITs, NITs, and Top Engineering Institutes

About the Internship

We are looking for detail-oriented and quality-focused QA Engineer Interns who are passionate about software testing, product quality, and user experience.

This internship offers hands-on exposure to manual testing, automation testing, API testing, bug tracking, test case creation, performance testing, and AI-enabled quality assurance systems.

Interns will work closely with Product, Engineering, DevOps, and Design teams on live product testing and quality improvement initiatives.

Key Responsibilities

- Assist in testing web and mobile applications.
- Create and execute test cases, test scenarios, and bug reports.
- Perform manual testing and support automation testing activities.
- Work on API testing and regression testing workflows.
- Identify, document, and track bugs/issues using testing tools.
- Collaborate with developers for issue validation and resolution.
- Participate in functional, usability, and performance testing activities.
- Support release testing and quality verification processes.
- Assist in maintaining QA documentation and reports.

- Explore AI-powered testing and automation workflows.

Required Technical Skills

Core Skills

- Basic understanding of:
 - Software Testing concepts
 - SDLC & STLC
 - Functional and Regression Testing
 - Bug lifecycle
- Familiarity with:
 - Test case writing
 - API testing basics
 - QA documentation
- Basic understanding of:
 - SQL
 - Web/Mobile application workflows

Preferred Skills

- Exposure to:
 - Selenium
 - Postman
 - JIRA
 - Test Management tools
 - Automation Testing concepts
- Basic understanding of:
 - Performance Testing
 - Security Testing
 - Agile methodologies
- Personal QA/testing projects are preferred.

AI Knowledge (Mandatory)

Candidates should have basic understanding of:

- Generative AI concepts.
- AI-powered testing and automation tools.
- Prompt Engineering basics.
- AI-assisted bug analysis and test automation.
- Intelligent quality monitoring systems.

What We Are Looking For

- Strong attention to detail and analytical mindset.
- Passion for software quality and user experience.
- Problem-solving and debugging abilities.
- Quick learner with process-oriented thinking.
- Good communication and teamwork skills.

Internship Benefits

- Hands-on exposure to real-world software testing processes.
- Opportunity to work on live product quality initiatives.
- Exposure to automation testing and AI-enabled QA systems.
- Mentorship from experienced QA and Engineering teams.
- Potential full-time opportunity based on performance.

Educational Qualification

- Pursuing Bachelor's/Master's degree in:
 - Computer Science
 - Information Technology
 - Software Engineering
 - Or related fields
