

Internship Opportunity: Business Intelligence (BI) Analyst Intern

Position: Business Intelligence (BI) Analyst Intern

Department: Business Intelligence / Analytics

Location: Indore / Mumbai

Internship Duration: 3–6 Months

PPO Opportunity: Yes – Based on Performance

Eligibility

Students pursuing:

- B.Tech / M.Tech / MBA
- Data Analytics / Business Analytics / Computer Science / Engineering
- Preferred from IITs, IIMs, NITs, and Top Institutes

About the Internship

We are looking for analytical and business-focused BI Analyst Interns who are passionate about transforming data into meaningful business insights and strategic decisions.

This internship offers hands-on exposure to business analytics, dashboard development, reporting systems, KPI tracking, data visualization, and AI-driven business intelligence solutions.

Interns will work closely with Product, Growth, Finance, Operations, and Analytics teams on live business reporting and decision-making initiatives.

Key Responsibilities

- Collect, analyze, and interpret business data from multiple sources.
- Assist in creating dashboards, reports, and KPI tracking systems.
- Work on business performance analysis and trend identification.
- Support data visualization and reporting automation activities.
- Prepare analytical summaries and business insight reports.
- Assist in data cleaning, validation, and quality monitoring.
- Collaborate with cross-functional teams for business reporting requirements.
- Support forecasting and data-driven decision-making activities.

- Explore AI-enabled analytics and reporting automation workflows.
- Participate in process improvement and business intelligence initiatives.

Required Technical Skills

Core Skills

- Basic understanding of:
 - Data Analytics
 - Business Intelligence concepts
 - Reporting and dashboarding
 - Business KPIs
- Familiarity with:
 - SQL
 - Excel/Google Sheets
 - Data visualization concepts
- Good analytical and logical thinking abilities.

Preferred Skills

- Exposure to:
 - Power BI
 - Tableau
 - Google Data Studio
 - SQL queries
 - Data Analytics projects
- Basic understanding of:
 - Data Warehousing
 - ETL concepts
 - Business Reporting systems
- Internship/project experience in analytics is preferred.

AI Knowledge (Mandatory)

Candidates should have basic understanding of:

- Generative AI concepts.
- AI-powered analytics and reporting tools.
- Prompt Engineering basics.
- AI-assisted dashboarding and reporting workflows.
- Intelligent business insight and automation systems.

What We Are Looking For

- Strong analytical and business-oriented mindset.
- Passion for data visualization and business insights.
- Curiosity to understand business trends and performance metrics.
- Good communication and presentation skills.
- Quick learner with problem-solving abilities.

Internship Benefits

- Hands-on exposure to business analytics and reporting systems.
- Opportunity to work on live business intelligence projects.
- Exposure to AI-driven analytics and automation tools.
- Mentorship from Analytics and Product teams.
- Potential full-time opportunity based on performance.

Educational Qualification

- Pursuing Bachelor's/Master's degree in:
 - Business Analytics
 - Data Analytics
 - Computer Science
 - Engineering
 - MBA
 - Or related fields
