

Internship Opportunity: DevSecOps Intern

Position: DevSecOps Intern

Department: DevOps / Cybersecurity / Cloud Engineering

Location: Indore / Mumbai

Internship Duration: 3–6 Months

PPO Opportunity: Yes – Based on Performance

Eligibility: Students pursuing:

- B.Tech / M.Tech
- Computer Science / Cybersecurity / Cloud Computing / IT
- Preferred from IITs, NITs, and Top Engineering Institutes

About the Internship

We are looking for passionate and security-focused DevSecOps Interns who are eager to work on secure cloud infrastructure, CI/CD automation, security monitoring, and modern DevOps practices.

This internship offers hands-on exposure to DevSecOps workflows, cloud security, infrastructure automation, container security, vulnerability management, and AI-enabled security automation systems.

Interns will work closely with Engineering, DevOps, Security, and Product teams on live infrastructure and secure deployment initiatives.

Key Responsibilities

- Assist in implementing secure CI/CD pipelines and deployment workflows.
- Support cloud infrastructure monitoring and security activities.
- Work on Docker and Kubernetes security practices.
- Assist in vulnerability scanning and security assessment tasks.
- Support infrastructure automation and configuration management.
- Monitor logs, alerts, and system performance for security risks.
- Participate in cloud security and compliance activities.
- Learn and contribute to Infrastructure as Code (IaC) security practices.

- Assist in incident response and troubleshooting activities.
- Explore AI-powered security automation and monitoring systems.

Required Technical Skills

Core Skills

- Basic understanding of:
 - Linux
 - Networking
 - Cloud Computing
 - Cybersecurity fundamentals
- Familiarity with:
 - Git
 - Docker
 - Shell scripting
- Basic understanding of:
 - CI/CD pipelines
 - DevOps concepts
 - Secure deployment workflows

Preferred Skills

- Exposure to:
 - Kubernetes
 - Jenkins/GitHub Actions
 - Terraform
 - AWS/Azure/GCP
 - Security scanning tools
- Basic understanding of:
 - DevSecOps concepts
 - Container Security
 - Cloud Security

- Infrastructure as Code (IaC)
- Personal security/devops projects are preferred.

AI Knowledge (Mandatory)

Candidates should have basic understanding of:

- Generative AI concepts.
- AI-powered security and monitoring tools.
- Prompt Engineering basics.
- AI-assisted automation and infrastructure monitoring.
- Security risks associated with AI-enabled systems.

What We Are Looking For

- Strong security and troubleshooting mindset.
- Passion for cloud infrastructure and secure automation.
- Curiosity to learn modern DevSecOps technologies.
- Quick learner with analytical thinking abilities.
- Good communication and teamwork skills.

Internship Benefits

- Hands-on exposure to DevSecOps and cloud security workflows.
- Opportunity to work on live infrastructure and deployment systems.
- Exposure to Kubernetes, CI/CD, cloud security, and AI-enabled automation.
- Mentorship from experienced Security and DevOps teams.
- Potential full-time opportunity based on performance.

Educational Qualification

- Pursuing Bachelor's/Master's degree in:
 - Computer Science
 - Cybersecurity
 - Cloud Computing

- Information Technology
- Or related fields

How to Apply

Interested candidates can share:

- Resume
- GitHub/LinkedIn/Profile Links
- Cloud/Security/DevOps Projects
- Internship Availability Duration
